## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 12 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plagens et al.

See reasons of record in the previous Office action. With respect to amended claim 21, field plates such as 84 are shown in figure 1 of the reference, and conductors such as 30 in figure 2 are between the plates and the Hall element itself.

Claims 1, 3-11, 13-20, and 22-27 are allowed.

### ***Conclusion***

Applicant notes that the rejected claims are written in means plus function form, and would therefore encompass the structures set out in the specification for accomplishing the stated means. The structure that apply dynamic (or varying) bias would be wires and voltage sources, as shown in the prior art reference. So it doesn't appear that recitation of means plus function would require structure distinct from that of the prior art.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2811

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
